Why Bottleless is Better

It's simple: Better water makes for better humans.

Finally, you can...

- ✓ Provide clean, delicious water for your home and office.
- ✓ Save recurring costs of large, bulky water bottles.
- ✓ Do your part for the environment by reducing greenhouse emissions and plastic waste.
- ✓ Purchase your water cooler, filters, installation kits, and accessories all at one time!

iMini Bottleless Water Cooler

Pictured model: iMini Black

MSRP: \$399.00 USD

Product Details

By using a bottleless water cooler, you help to minimize your carbon footprint and eliminate costly monthly rental fees associated with traditional home or office water dispensers. Instead of drawing water from a disposable plastic reservoir, which is often shipped across great distances in high-emissions vans and trucks, the iMini series of bottleless point of use (PoU) water coolers filter out harmful or unwanted contaminants as water is dispensed. The iMini Bottleless water cooler makes it easy to stay hydrated and saves even more space than other iBottleLess Coolers with it's space-saving design.

What's Included?

For one affordable payment of \$399.00, you'll receive the following:

iMini compact bottleless water cooler.

Complimentary micron filtration system.

Complimentary 3-step installation kit.

Shipping Weight: 66 lbs. (29.9 kg)

Key Benefits

Durable polyethylene cabinet is UV-resistant to eliminate rust and corrosion.

Stainless steel one gal. sealed reservoir for food-grade low temperature insulation.

Drip tray is dishwasher safe and all-in-one designed for easy cleaning.

One-touch adjustable thermostat.

Child-safe hot water faucet.

Lead-free steel internal components.

"I own a gym and this cooler provides enough cold water at all times for everyone. I don't have to worry about changing bottles anymore! Great looking cooler as well!"

~ Mandi H., Florida
