Why Bottleless is Better

It's simple: Better water makes for better humans.

Finally, you can...

- ✓ Provide clean, delicious water for your home and office.
- ✓ Save recurring costs of large, bulky water bottles.
- ✓ Do your part for the environment by reducing greenhouse emissions and plastic waste.
- ✓ Purchase your water cooler, filters, installation kits, and accessories all at one time!

iStandard Series Bottleless Water Cooler

Pictured model: iStandard Black

MSRP: \$389.00 USD

Shipping Weight: 66 lbs. (29.9 kg)

Product Details

By using a bottleless water cooler, you help to minimize your carbon footprint and eliminate costly monthly rental fees associated with traditional home or office water dispensers. Instead of drawing water from a disposable plastic reservoir, which is often shipped across great distances in high-emissions vans and trucks, the iStandard series of bottleless point of use (PoU) water coolers filter out harmful or unwanted contaminants as water is dispensed. The iStandard from iBottleless is perfect for homes and offices alike.

Key Benefits

-  Durable polyethylene cabinet is UV-resistant to eliminate rust and corrosion.
-  Stainless steel one gal. sealed reservoir for food-grade low temperature insulation.
-  Drip tray is dishwasher safe and all-in-one designed for easy cleaning.
-  One-touch adjustable thermostat.
-  Child-safe hot water faucet.
-  Lead-free steel internal components.

What's Included?

For one affordable payment of \$389.00, you'll receive the following:

-  iStandard bottleless water cooler (also available in white).
-  Complimentary micron filtration system.
-  Complimentary 3-step installation kit.

"I own a gym and this cooler provides enough cold water at all times for everyone. I don't have to worry about changing bottles anymore! Great looking cooler as well!"

~ Mandi H., Florida
